Pain Relief for Professionals

Software As A Service

P&O Expert is a Software as a Service (SAAS) based solution that provides the features and security required by the prosthetics and orthotics industry. P&O Expert is a web server based application that maintains all of your important data in a secure environment and provides an interface that allows you to easily access that information from anywhere.

SAAS Solutions are community driven programs, where users dictate what features will be made available next. You don't need to check for or install updates. Every time you login you are using the most current version.

Security

In the healthcare industry, security is as important if not more important than in any other industry. P&O Expert takes the security of your information seriously and follows the Microsoft standards for securing a web based application. This includes data encryption to secure all of your important data. Your connection to the application is also secured to by Transport Layer Security.

Making an Expert!

Experts like you have been helping us since 2007 when the planning for P&O Expert began. The information provided by countless professionals has been used to shape a product designed and built for Canadian Prosthetics and Orthotics professionals.

Contact Us

If you would like to know more about our product we can provide you additional detail, provide a demonstration of the product or even give you **FREE** access to try it out.
